EXPERIENCE	<b>Amazon Alexa AI</b> , Gaurav Sukhatme Exploiting Generalization in Offline RL via Uncertainty Filtering. <ul style="list-style-type: none"><li>• Motivated by exploiting the generalisation capabilities of learnt models, we propose a novel strategy for finding states far from the seen data distribution in offline RL while also having low epistemic uncertainty.</li><li>• We demonstrate that perturbing seen states in the direction of increasing and decreasing estimated value, along with uncertainty filtering, significantly improves performance on several offline RL tasks and benchmarks.</li></ul> <b>SRI International</b> , Giedrius Burachas Stochastic Video Prediction for Navigation <ul style="list-style-type: none"><li>• Applied disentangled representations for stochastic video prediction in a virtual Unity3D environment and the KITTI dataset.</li></ul> <b>University of Texas at Dallas</b> , Prof. Vincent Ng Event Coreference Resolution <ul style="list-style-type: none"><li>• Explored the use of recurrent neural networks for event coreference resolution</li></ul>	May 23, 2022 - August 19th, 2022 Summer 2018 Summer 2016
